

# RMax Mattress

RISK LEVEL  
MEDIUM

## Compatible with most profiling beds such as the Dali II

- SWL 175kg (28 stone)
- 2-way turn
- Anti-fungal Cover
- Pressure reduction supported by clinical data
- Suitable for profiling and non-profiling beds
- Vapour permeable cover
- 2 year warranty
- Washable Cover

The RMax mattress offers excellent pressure reduction for users considered to be at a 'medium risk' of developing a pressure sore.

The core is constructed of a medium density, high resilience foam, castellated on one side to aid with the free flow of air and reduce surface tension to the patient. High resilience foams are extremely elastic and provide more support than conventional foams thereby optimizing pressure redistribution.

The cover is made from a 220gm Polyurethane 4-way stretch vapour permeable fabric, with stitched or optional welded seams.

Available in a variety of sizes to suit our range of beds, giving you peace of mind that the mattress complies with the regulations regarding safety and entrapment.

## Specifications

Maximum User Weight	175kg (28 stone)
Standard dimensions	200 x 89 x 15.8cm
Platform Size	200 x 90cm
Mattress Weight	9 kg
Nominal Density Range	35 - 37 kg per m <sup>3</sup>
Nominal Hardness	135 Newtons
Fire Retardancy	BS7177: 2008 Medium Hazard
Chlorine resistance	Up to 1,000 ppm
Risk Category	Medium Risk
Warranty	2 years
Product Code	2002068 (for 200cm x 90cm platform size)

Maintenance label

Castellated foam core
